Hollis Voice: memo for the partners' meeting

Every claim is footnoted to the file it came from.

To: Partners Date: 2026-10-23 Re: Hollis Voice, Series A. Room data: The latest month the claims cover is 2026-09. Version: Shared version 3. Made from version 2.

Synthetic data room for Deal Flow NYC 2026. Not a real company.

1. Header

The round. Raising $9,000,000 at $45,000,000 pre-money.[1,2,3,4]

Notes

[1] pitch_deck.pdf, slide 1: "Series A | $9,000,000 | Brooklyn, New York | Founded 2024"; financial_model.xlsx, SERIES_A_RAISE: Assumptions, Series A raise (USD), Value: $9,000,000; cap_table.xlsx, Cap_Table!B24: Cap_Table, New money (USD), Class: $9,000,000.

[2] pitch_deck.pdf, slide 13: "$9,000,000 Series A"; pitch_deck.pdf, slide 14: "Calls handled, September 2026 72,149 3"; financial_model.xlsx, SERIES_A_RAISE: Assumptions, Series A raise (USD), Value: $9,000,000; cap_table.xlsx, Cap_Table!B24: Cap_Table, New money (USD), Class: $9,000,000.

[3] pitch_deck.pdf, slide 13: "$9,000,000 Series A"; pitch_deck.pdf, slide 14: "Calls handled, September 2026 72,149 3"; cap_table.xlsx, Cap_Table!B23: Cap_Table, Pre-money valuation (USD), Class: $45,000,000.

[4] pitch_video_script.md, line 31: "We are raising nine million dollars."; financial_model.xlsx, SERIES_A_RAISE: Assumptions, Series A raise (USD), Value: $9,000,000; cap_table.xlsx, Cap_Table!B24: Cap_Table, New money (USD), Class: $9,000,000.

2. Summary and the ask

Recommendation. Wait. Ask for the bank statements and the ARR walk before the partners meet. (Priya Shah, version 3)

Red flag 1: ARR figures in the room disagree. The room gives 5 ARR figures, side by side: $3,000,000 (pitch_video_script.md, line 15); $2,500,000 (pitch_deck.pdf, slide 3); $2,240,868 (monthly_metrics.csv, row 22, column arr for 2026-09); $2,060,868 (financial_model.xlsx, ARR_Build, Subscription ARR, ARR counted); $180,000 (financial_model.xlsx, ARR_Build, Marlow Veterinary Group (pilot), ARR counted). Behind this line, 2 checks on the room say why they differ.[5,6,7,8,9,10]

Red flag 2: Net revenue retention. Rebuilt from the customer file, 12-month net revenue retention is 87.3% over 68 customers in the 9 cohorts from 2025-01 to 2025-09 that have 12 months of data, against 102.6% over 57 customers in the Cohorts tab: 15.3 points lower, and the tab counts 11 customers fewer. 2 more claims on this, behind this line.[11,12,13]

Red flag 3: The plan keeps revenue after a contract ends. Marlow Veterinary Group pilot agreement: the term ends 2027-01-31 with no renewal clause, and the plan keeps its revenue for 8 plan months after it (2027-02 to 2027-09). $161,258 of plan revenue rests on it over those months, $17,815 of it in 2027-02, at its 8.0% share of the plan's starting $186,739.[14]

Red flag 4: Paying accounts. Contradicted: The deck (slide 3) gives paying customers as 357, but metrics export (row 22) says 212, 40.6% lower; revenue by customer (row 2133) says 212, 40.6% lower. 1 more claim on this, behind this line.[15,16]

Red flag 5: Customer concentration. Contradicted: The deck (slide 4) gives largest customer share as at most 9%, but revenue by customer (row 1984) says 21.0%. 1 more claim on this, behind this line.[17,18]

Red flag 6: Hires. Contradicted: The deck (slide 12) gives planned hires as 24 hires, but financial model (HIRES_COUNTED) says 8, 66.7% lower. 1 more claim on this, behind this line.[19,20]

No verdicts yet. Traction and revenue, retention, burn and runway, unit economics, customers, market, comps, team and the pitch itself.

What the company does and what it raises: not assessed yet. Needs the business frameworks scan.

Assessed so far. red-flag checks and deck claims. Not yet: comps, market signals, pitch video, contract readings, financial model rebuild, business frameworks, founder profiles, online presence, outside-in research and bank check.

Notes

4. Market

The pitch's figures. 1 figure from the pitch: 1 matches the room.[51]

Not assessed here yet: the market signals and business frameworks scans.

Checklist. At Series A, this section's 4 checklist items: 1 found, 3 not checked yet.

Notes

[51] pitch_deck.pdf, slide 8: "About 28,000 independent veterinary clinics in the United States (company estimate)."; pitch_deck.pdf, slide 14: "Calls handled, September 2026 72,149 3"; financial_model.xlsx, MARKET_TAM_USD: Market, Market size: clinics times annual contract value (USD), Value: $252,000,000.

5. Product

Product: not assessed yet. Needs the pitch video and online presence scans.

6. Business model and unit economics

The P&L row "Subscription revenue" matches subscription revenue in the customer file in all 21 actual months (largest difference $0). Billings differ from revenue by more than 1.0% in 18 of those months, which annual plans paid up front explain on their own.[52]

Ledger lines tie to P&L cost of revenue plus operating expenses in all 21 actual months (largest difference $0). No ledger line names a contractor, consultant, freelancer, agency or statement of work.[53]

Billed but not yet earned at 2026-09: $104,876 across 28 customers. The P&L row "Subscription revenue" does not exceed revenue earned in any month, and ARR_Build Subscription ARR ($2,060,868) is 12 times 2026-09 subscription revenue.[54]

One-time fees of $9,500 in 2026-09 are not in the mrr column: the gap between mrr and subscription MRR is $15,000, not the fee total, and the ARR_Build row "Onboarding fees" counts $0 of ARR.[55]

The pitch's figures. 5 figures from the pitch: 2 match the room; 3 have nothing in the room to check against (list price).[56,57,58,59,60]

Not in the room: signed order forms that show the list price, to back 3 pitch claims on list price (slide 5: $349; slide 7: $349; slide 7: $1,099)

Not in the room: signed order forms that show the plan's terms, to back 3 pitch claims on plan limit (slide 7: One location; slide 7: up to 3; slide 7: up to 3)

Checklist. At Series A, this section's 4 checklist items: 1 found, 3 not checked yet.

[60] pitch_deck.pdf, slide 7: "$349 $649 $1,099 Custom a month a month a month per agreement".

7. Traction and customers

Net revenue retention. The Cohorts tab states 12-month net revenue retention of 102.6% for 57 customers in 9 cohorts. The tab defines a cohort as "customers still active after onboarding".[61]

Red flag 2. Net revenue retention. Shown in full in the summary.

Gross revenue retention. Rebuilt 12-month gross revenue retention is 73.4% over the same 68 customers, under the 80% line.[62]

Red flag 1. ARR figures in the room disagree. Shown in full in the summary.

Brookline Row Veterinary order form: no exclusivity, most-favoured-customer or change-of-control clause.[63]

Cedar & Pine Animal Hospitals order form: no exclusivity, most-favoured-customer or change-of-control clause.[64]

Cedar & Pine Animal Hospitals order form: a clause that holds the fees fixed, page 2, clause 2.[65]

Marlow Veterinary Group pilot agreement: no exclusivity, most-favoured-customer or change-of-control clause.[66]

Brookline Row Veterinary order form: no right to end it without cause; the notice not to renew sets the exit at the term end; the earliest exit is 2027-05-31, 243 days after 2026-09-30, beyond the 90-day line. It is counted at $584 MRR in 2026-09.[67]

Brookline Row Veterinary order form: the term ends 2027-05-31, and 4 plan months (2027-06 to 2027-09) come after it, resting on its automatic renewal. It is 0.31% of the plan's starting figure, below the 1% line. $3,355 of plan revenue rests on it over those months, $796 of it in 2027-06, at its 0.31% share of the plan's starting $186,739.[68]

Brookline Row Veterinary order form: effective 2026-06-01; the customer file's first month with MRR is 2026-06.[69]

Cedar & Pine Animal Hospitals order form: no right to end it without cause; the notice not to renew sets the exit at the term end; the earliest exit is 2027-10-31, 396 days after 2026-09-30, beyond the 90-day line. It is counted at $36,000 MRR in 2026-09.[70]

Cedar & Pine Animal Hospitals order form: the term ends 2027-10-31, after the last plan month (2027-09), so no plan month rests on a renewal. The last day to give notice not to renew, 2027-08-02, falls inside the plan window (2026-10 to 2027-09).[71]

Cedar & Pine Animal Hospitals order form: effective 2025-11-01; the customer file's first month with MRR is 2025-11. The change from 2026-04-01 takes effect in the file in 2026-04: $18,000 in 2026-03, $36,000 in 2026-04.[72]

Red flag 3. The plan keeps revenue after a contract ends. Shown in full in the summary.

Marlow Veterinary Group pilot agreement: effective 2026-08-01; the customer file's first month with MRR is 2026-08.[73]

Contracts in the room cover $51,584 of the $186,739 counted MRR in 2026-09 (27.6%), from monthly_metrics.csv for 2026-09.[74]

The deck's revenue chart on slide 3 has 21 bars for 2025-01 to 2026-09; their shape matches 'Recurring revenue (subscription plus pilot)' in the P&L (largest difference 0.4 points of the tallest bar).[75]

The revenue chart on slide 3 starts at 2025-01, the first revenue month in the books, and runs to 2026-09 with no month left out.[76]

The deck's plan growth of 3.5% a month (slide 11) matches the model's plan columns, which grow 3.50% to 3.50% a month. It is a plan, not a period the books hold as actuals.[77]

Red flag 4. Paying accounts. Shown in full in the summary.

Red flag 5. Customer concentration. Shown in full in the summary.

The pitch's figures. 1 figure from the pitch: 1 matches the room.[78]

Not in the room: a revenue export that separates pass-through money

Not in the room: a balance sheet with a deferred revenue line

Not in the room: the contract for each of these 7: Subscriptions signed 2025 Q1 (13 customers); Subscriptions signed 2025 Q2 (14 customers); Subscriptions signed 2025 Q3 (21 customers); Subscriptions signed 2025 Q4 (32 customers, 1 of them with a contract in the room); Subscriptions signed 2026 Q1 (36 customers); Subscriptions signed 2026 Q2 (40 customers, 1 of them with a contract in the room); Subscriptions signed 2026 Q3 (56 customers).

Not in the room: a cohort export built from revenue by customer, to back 2 pitch claims on cohorts (slide 6: Nine cohorts; slide 6: January to September 2025)

Not assessed here yet: the pitch video scan.

Checklist. At Series A, this section's 30 checklist items: 15 checked, 8 missing, 7 not checked yet.

12. Risks and open questions

Red flag 1: ARR figures in the room disagree. Shown in full in the summary. Settled by: the founder walking from the source data to these figures.

Red flag 2: Net revenue retention. Shown in full in the summary. Settled by: the founder walking from the source data to these figures.

Red flag 3: The plan keeps revenue after a contract ends. Shown in full in the summary. Settled by: the founder walking from the source data to these figures.

Red flag 4: Paying accounts. Shown in full in the summary. Settled by: the founder walking from the source data to these figures.

Red flag 5: Customer concentration. Shown in full in the summary. Settled by: the founder walking from the source data to these figures.

Red flag 6: Hires. Shown in full in the summary. Settled by: the founder walking from the source data to these figures.

Not in the room. Documents the room does not hold are listed in their sections: Traction and customers (4), Business model and unit economics (2), Financials, burn and runway (2) and Deal terms (7).

Ask about the Marlow pilot first. (Sam Okafor, version 2)

14. Diligence: what was checked and what to ask

Coverage. At Series A, 193 checklist items: 24 checked, 12 found, 45 missing, 112 not checked yet, 0 not expected.

Checked. 24 items: KPI dashboard or metrics export (MRR, ARR, customers, churn); Monthly revenue by customer; MRR column matches the subscription rows; Revenue is what was delivered, not bookings or billings; Cash collected ahead of delivery is not counted as earned; One-time fees kept out of MRR, ARR and recurring revenue; and more.

Found, not checked yet by a script. 12 items: Hiring plan and future org; Unit economics (CAC, LTV, payback); Market sizing and competitive landscape; Founder bios; Key team bios and org chart; Cover note and document index; and more.

Missing. 45 items: Audited or reviewed financials; Investor update archive; Earlier investor updates agree with today's numbers; Reviewed or audited numbers match management numbers; Bank statements (3 to 12 months); Revenue in the deck reaches the bank; and more.

Could not verify. None. Every claim's quote was found again at its source when this memo was exported.

15. Recommendation

Wait. Ask for the bank statements and the ARR walk before the partners meet. (Priya Shah, version 3)

16. Sources and change log

Sources. 92 places in 12 files of the room, read 2026-10-23. Each claim's note names its own file and place.

Version 1. Drafted from the readout built 2026-10-23T03:40:13Z. By Tricorder, 2026-10-23 03:40.

Version 2. Added a line to section 12. By Sam Okafor, 2026-10-23 03:43.

Version 3. Added a line to section 9; filled the blank in section 15; replaced Tricorder's line "Every ledger line is booked as..." in section 10 (its claims detached: the new sentence states a figure they do not). By Priya Shah, 2026-10-23 03:43.
